Your views about online learning?

18 responses

It's has its own advantages and disadvantages it's depends on student how he'll handle the situation

Let's be more precise and say that it's called " self learning" getting more time for us was the plus point always

Online learning makes it easy to choose not only the convenient time and place to learn but also your own pace.

Shit (just heard from my sis)

I think Its really okay but If it's taken in relative comparison with offline then offline for sure is better 🧐

Good

Online is not so good.....
